

Week 1

GitHub : <https://github.com/xqlin0220/FIT5032>

The image shows a screenshot of a web browser and a code editor. The browser window at the top displays the Vite App page for a new project, "You did it! You've successfully created a project with Vite + Vue 3. Hello, I'm Xuqing Lin!". The page includes links to the GitHub Repository, Documentation, Tooling, Ecosystem, and Community. The code editor below shows the file explorer with a project structure including "week1", "src", "components", and "MyName.vue". The "MyName.vue" file is open, showing a template with a h2 tag, a p tag with a link to the GitHub repository, and a script setup block. The terminal at the bottom shows the command "fit5032-week1@0.0.0 dev" and the output "vite" and "7:35:10 PM [vite] (client) Re-optimizing dependencies because vite config has changed".

Browser Window:

- Address bar: localhost
- Page title: Vite App
- Page content: "You did it! You've successfully created a project with Vite + Vue 3. Hello, I'm Xuqing Lin! GitHub Repository: <https://github.com/xqlin0220/FIT5032>"
- Documentation: Vue's [official documentation](#) provides you with all information you need to get started.
- Tooling: This project is served and bundled with [Vite](#). The recommended IDE setup is [VSCode](#) + [Vue - Official](#). If you need to test your components and web pages, check out [Vitest](#) and [Cypress / Playwright](#). More instructions are available in [README.md](#).
- Ecosystem: Get official tools and libraries for your project: [Pinia](#), [Vue Router](#), [Vue Test Utils](#), and [Vue Dev Tools](#). If you need more resources, we suggest paying [Awesome Vue](#) a visit.
- Community: Got stuck? Ask your question on [Vue Land](#) (our official Discord server), or [StackOverflow](#). You should also follow the official [@vuejs.org](#) Bluesky account or the [@vuejs](#) X account for latest news in the Vue world.
- Support Vue: As an independent project, Vue relies on community backing for its sustainability. You can help us by [becoming a sponsor](#).
- Footer: Hello, I'm Xuqing Lin! tHub Repository: <https://github.com/xqlin0220/FIT5032>

Code Editor Window:

- File Explorer: week1 > src > components > MyName.vue
- MyName.vue content:

```
1 <template>
2   <h2>Hello, I'm Xuqing Lin!</h2>
3   <p>
4     GitHub Repository:
5     <a href="https://github.com/xqlin0220/FIT5032" target="_blank">
6       https://github.com/xqlin0220/FIT5032
7     </a>
8   </p>
9 </template>
10
11 <script setup></script>
12
13 <style scoped>
14   h2 {
15     color: #42b983;
16   }
17 </style>
18
```
- Terminal: week1 > fit5032-week1@0.0.0 dev > vite
- Terminal Output: 7:35:10 PM [vite] (client) Re-optimizing dependencies because vite config has changed
- Terminal Output: ROLLDOWN-VITE v7.0.11 ready in 319 ms
- Terminal Output: + Local: http://localhost:5173/
- Terminal Output: + Network: use --host to expose
- Terminal Output: + Vue DevTools: Open http://localhost:5173/__devtools__ as a separate window
- Terminal Output: + Vue DevTools: Press Option(v)+Shift(s)+D in App to toggle the Vue DevTools
- Terminal Output: + press h + enter to show help

Chat Window:

- Ask about your code. AI responses may be inaccurate.
- Add Context: MyName.vue
- Ask: GPT-4.1

Week 2

JSON Data & Vue Directives Lab

Working with JSON Arrays

Our `authors.json` contains an array of author objects.

Iterating through Arrays

- Jane Austen (1775)
- George Orwell (1903)
- Agatha Christie (1890)

Filtering Arrays

Authors born after 1850:

- George Orwell (1903)
- Agatha Christie (1890)

Mapping Arrays

Famous works:

- Pride and Prejudice
- Sense and Sensibility

Mapping Arrays

Famous works:

- Pride and Prejudice
- Sense and Sensibility
- 1984
- Animal Farm
- Murder on the Orient Express
- Death on the Nile

Finding in Arrays

Finding by property: George Orwell

Nested Arrays/Objects

Jane Austen's works:

- Pride and Prejudice
- Sense and Sensibility

Working with JSON Objects

Our `bookstores.json` is a JSON object
